

Agustin Diez Martinez

Frontend Architect & Technical Leader | Angular · React · TypeScript

agustindxm@gmail.com · +54 9 1122965128 · Tandil, Buenos Aires, Argentina

DualBoot · Nov 2024 - Present

Frontend Architect · Client: Suzy (AI-powered market research platform)

Serving as Frontend Architect for Suzy, an AI-powered platform that delivers real-time consumer insights across quantitative and qualitative workflows with advanced segmentation.

I lead the frontend architecture and delivery of multiple solutions with a small, distributed team — currently working with both Angular and React. I set technical direction, establish standards and best practices, and mentor engineers through design and implementation to ensure scalability, performance, and maintainability. For daily development, I leverage AI-assisted workflows with Claude and Cursor to accelerate implementation and maintain code quality. I coordinate deployments using the Azure suite, partnering with cross-functional stakeholders to align timelines, reduce risk, and keep releases predictable.

Technologies: Angular 20 · React · TypeScript · Claude · Cursor · Microsoft Azure (Azure DevOps)

Applaudo · Jul 2024 - Nov 2024

Technical Lead · Government Client: Municipality of Zacatecoluca (El Salvador)

Led a 7-person frontend team to deliver a Tax Management System for the Municipality of Zacatecoluca, under El Salvador's Secretariat of Technological Innovation. Drove execution across a three-month delivery window; the client later paused the initiative due to funding constraints.

Partnered closely with UX and Backend teams to refine requirements, prioritize scope, and maintain delivery velocity. Coordinated deployments with DevOps, upheld engineering best practices (code quality, reviews, CI discipline), and conducted stakeholder demos to align expectations and secure sign-offs.

Technologies: Angular 18 · NgRx · Signals · TypeScript · Google Cloud Platform (GCP)

MinData · Mar 2023 - Jul 2024

Angular Developer · RIU Hotels (Hospitality)

Member of a bug-fixing team maintaining and enhancing eight globally impactful Angular applications in the hospitality sector. Operated within Kanban methodology to identify and resolve critical issues quickly, minimizing impact on user experience.

Oversaw the full CI/CD process and deployments via Jenkins. Collaborated with the team to ensure updates and fixes were rolled out smoothly without disrupting operations.

Technologies: Angular 16 · Jenkins · Nexus · SonarQube · Java

Deep Creek Solutions · Mar 2023 - Jul 2023

Angular Instructor · Client: Dedalus (Medical Software)

Mentored six interns — senior students from the University of Malaga and vocational trainees — over four months. Covered Angular from the ground up: Routing, Components, Services, Directives, Pipes, RxJS, and NgRx. Interns built individual projects with public APIs and a custom authentication backend.

Led the program using SCRUM-Kanban; interns documented progress on Trello with iterative development and peer reviews. Prepared participants for professional contribution; all graduated capable of independently developing applications.

Technologies: Angular · RxJS · NgRx · Trello

Distillery · Aug 2021 - Mar 2023

Angular Developer · Client: Filmtrack (Media Entertainment)

Worked directly for client Filmtrack on media entertainment products. Developed a CRM in Angular with Akita for managing contracts and rights; migrated legacy CRM systems for multiple clients. Delivered a technical presentation on Angular best practices for onboarding new developers.

- Trained on backend tickets to expand full-stack capabilities
- Built services following Akita design patterns
- Drove Angular architecture and RxJS-oriented design patterns

Technologies: Angular 11 · Akita · RxJS · C# · MySQL · Bash · TypeScript · Jasmine

Trenda Software · Mar 2018 - Jan 2021

Frontend Technical Leader

Led two cross-functional teams (2 FE, 2 BE devs, 1 BA, 2 UX designers). Managed client requirements through regular meetings and feedback cycles. Delivered weekly increments using SCRUM-Kanban; conducted retros, groomings, and daily standups.

- Developed vlife, a mobile app with Ionic 5
- Built a Java wrapper for the Mercado Libre SDK (Ionic-Capacitor)
- Performed client-facing demos and aligned deliverables with expectations

Technologies: Angular 8 · Ionic 5 · Node.js · Firebase

Overactive · Mar 2018 - Feb 2021

Frontend Developer · Clients: XPO Logistics, IPTI Healthcare

Joined XPO Logistics leveraging prior logistics experience (BeeReal). Worked on real-time GPS tracking and IoT storage for package load status. Later transferred to IPTI Healthcare, applying IoT real-time tracking for surgical material trays in US hospitals.

- Delivered CI/CD QA automation; fixed bugs from SonarQube reports
- Migrated to latest Angular versions; achieved 90%+ test coverage with Jasmine
- Collaborated with UX team on enhancements; documented BE microservices with Swagger

Technologies: Angular 8 & 11 · RxJS · NgRx · SonarQube · Cypress · AG-Grid · Jasmine

XOOR · Feb 2018 - Mar 2018

Vue.js Developer · Client: Honeybee Health

Built a cross-platform CRM (mobile, web, desktop) with Vue.js. Consumed backend APIs via GraphQL and integrated components into Shopify.

Technologies: Vue.js · GraphQL · Shopify

BeeReal · Mar 2017 - Feb 2018

Full Stack Developer · Client: DHL (Logistics)

Worked with DHL on full-stack requirements and participated in architecture discussions with logistics-industry developers to improve truck GPS tracking performance. Also developed WordPress sites for local clients.

- Company intranet in Angular 6 with Firebase and Parse
- Net Ops Assistant: hybrid mobile app (Ionic 3, Node.js, SQL)
- CAP Reports & Brain Portal: Angular 6 web consoles with Node.js and MongoDB

Technologies: Ionic 3 · Angular 6 · Node.js · MongoDB · Firebase · Parse

Globant · Aug 2016 - Mar 2017

Quality Assurance Engineer · Client: Open Bank (European banking)

Assigned to a European bank based on prior QA experience in banking. Built automation test suites and API tests for Java microservices powering a REST API consumed by a mobile app. Developed automated regression tests for frontend (Selenium) on an employee management project.

Technologies: Java 8 · JMeter · TestNG · JavaScript · Jenkins · Selenium · SoapUI · Postman
